# Origami Moose

1.
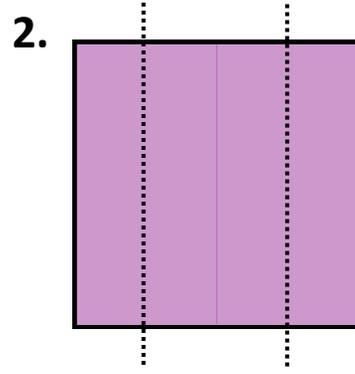

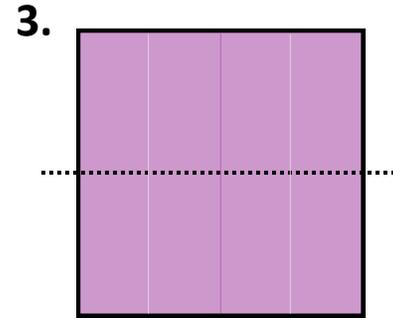

Fold a square piece of paper in half, vertically.

2.

Flip the paper over, and fold the right and left sides in so that the sides are flush with the center fold.
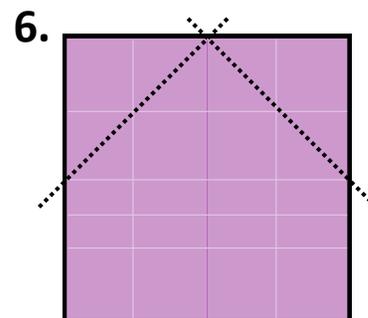

3.

Fold the paper in half, horizontally.

4.

Fold the top and bottom sides so that they are flush with the center fold (just like in step 2).

5.

Fold the right and left sides in, and fold the bottom up to the crease line shown above. Unfold and lay the paper flat.
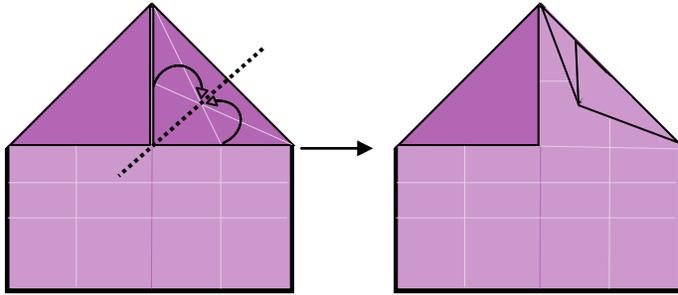

6.

Fold the top right and left corners to the center of the paper, and keep them in this position.
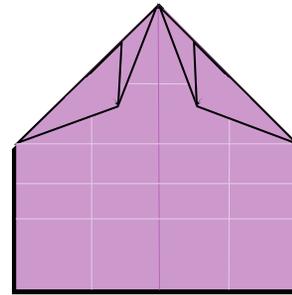

7.

On the right flap, fold both edges so that they are flush with the top right edge (along the dotted lines above). Leave this flap open, leaving the two crease lines.
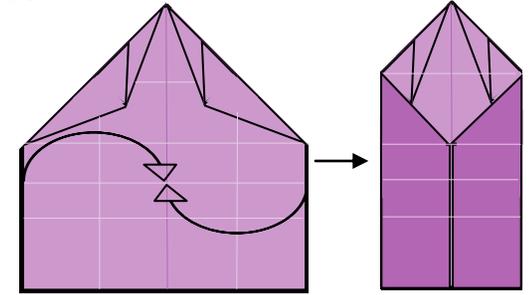

8.

Bring the two sides of the flap and pinch them together, and fold it down the center. Fold the crimp down flat.
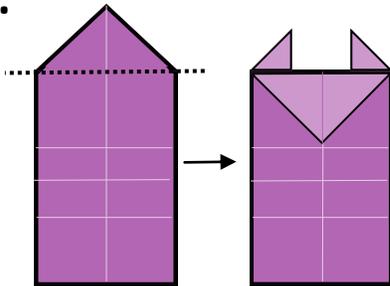

9.

Repeat steps 7-8 on the other flap.

10.

Fold the right and left sides along the center (similar to step 2), so that it looks like the image above.
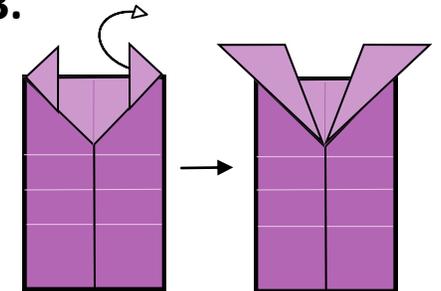

11.

Flip the paper over, and fold the top point down.
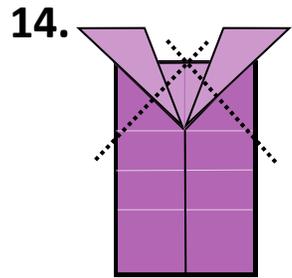

12.

Fold the sides of each flap flush against the top, and crimp them together (similar to step 8). Fold the flap down.
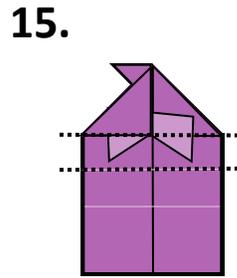

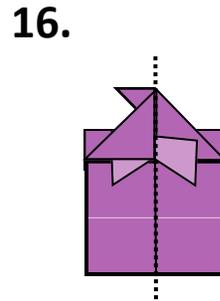

13.

Flip the paper over, and pull out the triangles shown above. This is a tricky step, but it should look like the image on the right.
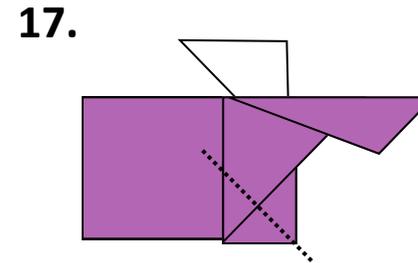

14.

Fold the right and left corners in along the center line, one corner above the other.

15.

Perform and S-fold, by folding the top forward along the upper dotted line, and then backward on the lower dotted line.
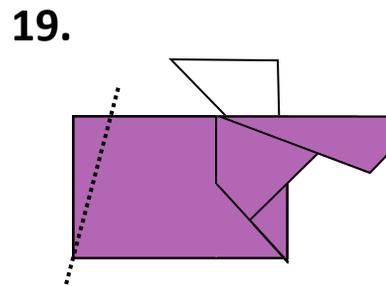

16.

Fold in half along the dotted line, bringing the sides down and the antlers up.

17.

Fold the corner of the flap diagonally along the dotted line, and tuck it inwards. Repeat on other side.

18.

Fold the tip of the moose's nose along the dotted line, and then fold it inward.

19.

Fold the back along the dotted line, and fold both flaps inward.

20.

Push the top and bottom down to make a light crease. Open up the moose so that it can stand on its own.

Congratulations! You've created a moose!
